Company Introduction

COMPANY INTRODUCTION

Guangdong Baolun Electronics Co., Ltd. (itc), established in 2008, with its brand itc founded in 1993, is a national high-tech enterprise specializing in the integration, research and development, manufacturing, marketing, and comprehensive services of audiovisual and lighting systems. Company focuses on digitalization and smart+ R&D products and solutions. Product range includes: smart digital conferencing system, intelligent paperless conference system, 4K high-definition remote video conference system, digital professional sound system, smart central control matrix system, smart integrated command and dispatch platforms (command centers), high-definition LED display, stage lighting, landscape lighting, immersive performance platform, smart IoT energy management systems, educational informatization management system, digital IP PA system, rail transit PA system, smart cultural tourism audio and video systems, voice alarm evacuation system, smart hospital solution etc. These systems are widely applied in areas such as smart governance, digital governance, smart education, smart infrastructure, smart information systems, and intelligent buildings, providing multi-scenario, industry-specific audiovisual solutions and vertical services to users. Till the end of 2023, the company has developed over 70 series of audiovisual and lighting systems. All products have independent intellectual property rights and brand ownership, and have obtained various certifications.

Company currently employs **6,000** people, including **1,300** R&D staff. It has **5** major production factory, a leading industry intelligent manufacturing industrial park covering **300,000** square meters, **4** modern marketing and office buildings, **15** R&D centers, and **6** modern experience centers, with **240** service center established globally.

COMPANY OPERATION PHILOSOPHY

★ **Mission:** Leading industry

★ **Vision:** Build first class world brand

★ **Operation philosophy:**

1. Serving customer, focusing on performance, eager for innovation, and insisting on win-win cooperation
 2. High end product, middle level price, beyond customer's expectation
-

★ **R&D purpose:** Leading the industry, to be No.1

★ **Service concept:** Offering one-stop solution including project design + system configuration + client operation training + after-sales service

PRODUCT RANGE

The TS-0300M conference system

Fully digital conference system
5G conference system
4K remote video conference system
Intelligent paperless conference system
Simultaneous interpretation system
Wireless voting system
Intelligent central control matrix system
Conference HD recording system
Professional conference sound reinforcement system
Conference screen display system
Voice transcription system
Cloud conference management platform

NO.1

Speaker system

Professional speakers for theaters
Professional speakers for lecture halls
Professional speakers for stadiums
Professional speakers for KTV/party rooms
Professional speakers for bars/nightclubs
Professional speakers for cinemas
Professional speakers for outdoor performances
Professional speakers for cultural tourism
Professional speakers for conferences
Digital mixers
FPGA high-end audio processors
Third-generation digital amplifiers
Immersive performance platform
Audiovisual and lighting control integrated management platform

NO.1

Command center system

Distributed integrated management platform
Remote command and dispatch system
Fiber matrix command and dispatch platform
Splicing matrix system
Fusion all-in-one machine
Command and operation dispatch platform
Fusion communication dispatch platform
Intelligent central control matrix system

NO.1

Digital IP PA system

8th generation digital IP PA system
Campus PA system (anti-bullying)
Rail transit PA system
Cultural and tourism digital audio platform
Digital airport PA system
Offshore oil audio platform
Directional PA system
EN54 certified Voice alarm evacuation system
4G Emergency PA system
Campus intelligent IP PA system
Visual PA system
Visual intercom system
Voice guide system
Industry digital PA system

NO.1

Educational information system

Cloud-controlled classroom system
Quality recording and broadcasting system
Special delivery classroom system
Practical training classroom system
Virtual simulation desktop terminal
Group discussion system
Paper and pen interactive system
Classroom sound reinforcement system
Listening test system
Smart listening and learning system
Classroom subtitle system
Room management system
Smart class information board system
Intelligent interactive flat panel, interconnected blackboard
Educational business display screen
Healthy lighting system
AI smart sports system
Physics, chemistry and biology experiment test system
Campus TV station system
Campus data cockpit
Campus platform
Campus digital twin platform

NO.1

Lighting system

Theater lighting
Lecture hall lighting
Sports stadium lighting
KTV/party room lighting
Bar/nightclub lighting
Outdoor performance lighting
Cultural tourism lighting
Stage machinery system
Intelligent power system
Landscape lighting system
Education lighting system
Audiovisual and lighting control platform
3D virtual visualization software

NO.1

Application Scenario

APPLICATION SCENARIOS—CONFERENCE ROOM (ABOUT 12,000 MEETING ROOM PROJECT CASES EACH YEAR)

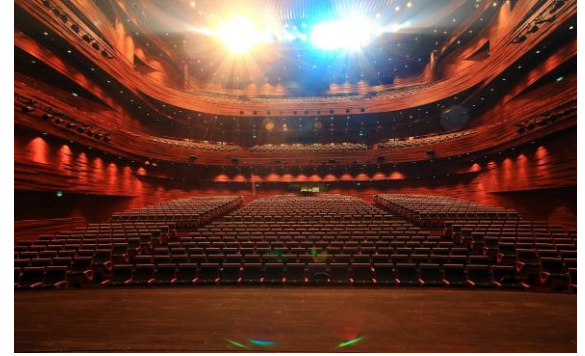

Conference room solutions include: full-digital conference system, 5G conference system, 4K remote video conference system, intelligent paperless conference system, simultaneous interpretation system, wireless voting system, intelligent central control matrix system, conference HD recording system, professional conference sound system, conference screen display system, speech transcription system, cloud conference management platform, intelligent interactive flat panel series and other systems. **At present, our market share and advanced functions are among the best in China**, and we are widely used in small, medium and large conference rooms in various industries and scenarios such as government, school, military, medical, elderly care, public security, procuratorial, judicial, cultural tourism, transportation hub, energy and electricity, emergency, big data center, etc.

APPLICATION SCENARIOS—LECTURE HALLS AND AUDITORIUMS (ABOUT 4,000 LECTURE HALL AND AUDITORIUM PROJECT CASES EVERY YEAR)

The lecture hall/auditorium solution includes: specialized speakers for lecture halls/auditoriums, digital mixer, MIR high-end audio processors, third-generation digital power amplifiers, immersive sound performance platforms, audiovisual and lighting integrated management platforms, high-definition LED display screens, dedicated lighting for lecture halls/auditoriums, stage machinery and other systems. **Currently, it ranks among the best in China in terms of market share and advanced functions**, and is widely used in lecture halls in various industries such as government, schools, the military, medical care, elderly care, public security, procuratorial and judicial departments, culture and tourism, transportation hubs, energy and electricity, emergency response, big data centers, etc.

APPLICATION SCENARIOS—THEATER (ABOUT 160 THEATER PROJECT CASES EACH YEAR)

Theater solutions include: theater-specific speakers, digital mixing consoles, MIR high-end audio processors, third-generation digital power amplifiers, immersive performance platforms, audiovisual and lighting integrated management platforms, high-definition LED display screens, theater-specific lighting, stage machinery and other systems. **The current market potential is enormous.**

APPLICATION SCENARIOS—STADIUM (ABOUT 1,500 SPORTS STADIUM PROJECT CASES EACH YEAR)

Stadium solutions include specialized speakers for stadiums, digital mixers, MIR high-end audio processors, third-generation digital power amplifiers, high-definition LED displays, stage lighting, stage machinery, 8th-generation digital IP PA systems, content management, query navigation, and other related systems. **The current market potential is enormous.**

APPLICATION SCENARIO - BAR/NIGHTCLUB (ABOUT 700 BAR PROJECT CASES EACH YEAR)

Bar/Nightclub solutions include: specialized speakers for bars/nightclubs, pure digital mixers, MIR high-end audio processors, third-generation digital power amplifiers, specialized lighting for bars/nightclubs, and other systems. **Currently benchmarking against world-class standards, with enormous market share potential.**

APPLICATION SCENARIO—KTV/PARTY ROOM

KTV/Party Room solutions include: specialized speakers for KTV/party rooms, pure digital mixers, MIR high-end audio processors, third-generation digital power amplifiers, KTV-specific lighting, and other systems. **Currently benchmarking against world-class standards, with enormous market share potential.**

APPLICATION SCENARIOS—COMMAND CENTER (ABOUT 3,000 COMMAND CENTER PROJECT CASES EACH YEAR)

Command Center Solutions include: visual management systems, optical matrix command and dispatch platforms, splicing matrix systems, all-in-one integration machines, command operation and dispatch platforms, unified communications dispatch platforms, HD LED displays, professional conference sound reinforcement, 4K HD remote video conference, intelligent paperless conferences, intelligent central control matrices, and other systems. Currently **leading the market share in China**, widely used in command centers across various industries, including healthcare, elderly care, public security, law enforcement, military, tourism, transportation hubs, energy and power, emergency response, big data centers, airports, high-speed railway stations, exhibition halls, and more.

APPLICATION SCENARIOS—PA SYSTEM (COUNTLESS EXAMPLES OF PA PROJECTS)

PA System Solutions include: 8th-generation digital IP PA systems, campus PA systems (anti-bullying), rail transit PA systems, cultural tourism digital audio platforms, digital airport PA systems, maritime oil audio platforms, directional PA systems, national standard emergency PA systems, EVAC PA systems, 4G emergency PA systems, campus emergency PA systems, visual PA systems, visual intercom systems, voice-guided tour systems, industry-specific digital PA systems, and more. Currently **leading the market share in China**, widely used in various scenarios including campus background music listening tests, government, military, healthcare, elderly care, public security, law enforcement, cultural tourism, transportation hubs, energy and power, emergency response, big data centers, parks and plazas, sports venues, exhibition halls, and more.

APPLICATION SCENARIO - CULTURAL TOURISM INDUSTRY (ABOUT 5,000 CULTURAL TOURISM PROJECT CASES EACH YEAR)

Cultural Tourism Industry Solutions include: digital audio platform, professional sound system for cultural tourism, HD LED display, cultural tourism guide, audio guide (float parade) and other systems. **The current market potential is huge.** Widely used in various theme parks, characteristic towns, gymnasiums, cultural and sports centers, exhibition halls and other scenes.

APPLICATION SCENARIOS—MEDICAL INDUSTRY (COUNTLESS HOSPITAL PROJECT CASES)

Medical triage

Medical intercom

Ward IPTV

Content management

Surgery demonstration

ICU visitation

Master and slave clock

Remote consultation

Healthcare Industry Solutions include: medical triage systems, medical intercom systems, ward IPTV systems, ICU visitation systems, master-slave clock systems, content management systems, remote consultation systems, surgery demonstration systems, and other related solutions. Currently, **the market potential for growth is immense.**

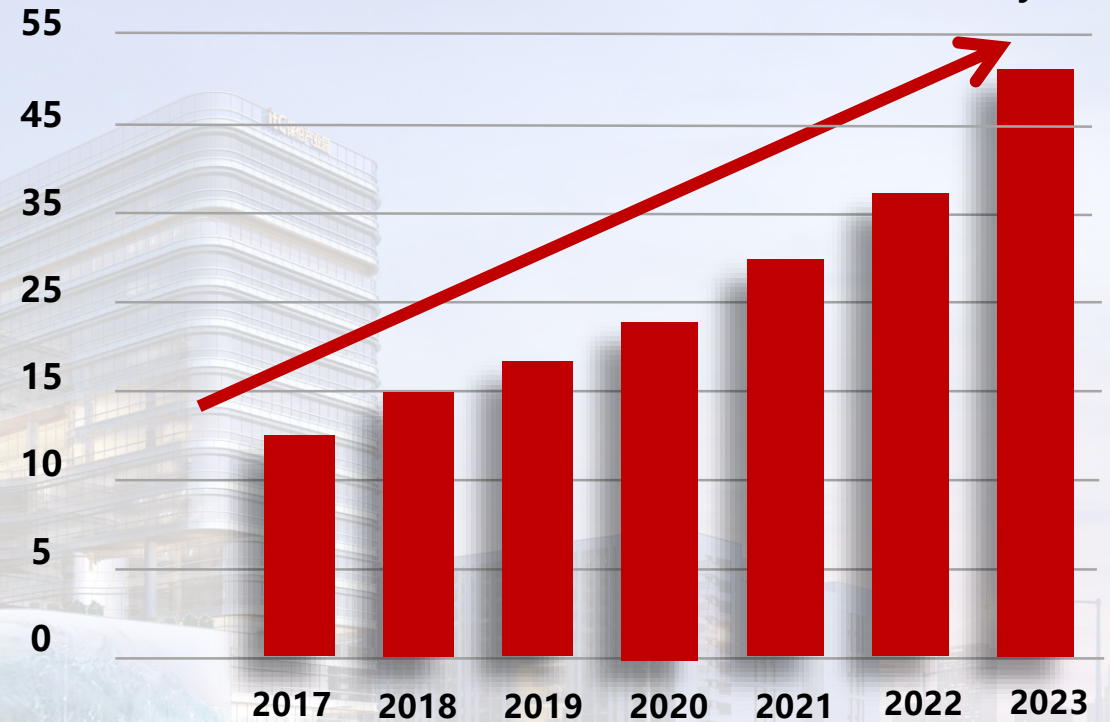

Brand Strength

COMPANY PERFORMANCE

Sales exceeded 5 billion Chinese yuan, laying a solid foundation for the high-quality development of the company in 2023. The company is about to go public.

5 billion 2023 annual turnover

Unit: 100 million yuan

BRAND STRENGTH: MARKET SHARE

**Leading Intelligent
Conference System in China**

Leading in China in terms of market share, performance, function, quality, digitalization and intelligent integration

**Leading professional sound
system in China**

Leading in China in terms of market share, functions, quality, sound quality, digitization and intelligent integration

**Command Center at the
forefront in China**

Leading in China in terms of market share, performance, function, quality, digitalization and intelligent integration

**PA system at the forefront in
China**

Leading in China in terms of market share, performance, function, quality, digitalization and intelligent integration

**Cultural and tourism system
at the forefront in China**

Leading in China in terms of market share, performance, function, quality, digitalization and intelligent integration

**Lighting system at the
forefront of China**

Leading in China in terms of market share, performance, function, quality, digitalization and intelligent integration

Advanced software platforms

R&D Strength

15 R&D CENTERS (61 DEPARTMENTS)

The company has 1,300 research and development (R&D) personnel, with 30% holding master's degrees. It invests 10% to 12% of annual revenue into R&D. The company possesses industry-leading technologies and products, supported by a world-class R&D management system

Professional audio R&D center

Focus on the research and development of professional audio and power supply, including professional digital power amplifiers, power amplifier digital audio processing, professional digital mixers, professional audio peripherals, new energy power supplies, and digital power supply products.

Digital PA R&D center

Focus on the research and development of digital PA products, including the eighth-generation IP PA, rail transit PA, airport PA, offshore platform PA, cultural tourism audio system, intelligent voice guide system and other products

Conference audio R&D center

Focus on the research and development of conference audio products, including all-digital conference systems, simultaneous interpretation systems, wireless voting systems, audio processors, electronic namaplates, digital wireless microphones, teaching sound reinforcement systems and other products

Command center R&D center

Focus on video and platform product lines, including splicing matrix, seat management, command and dispatch, IoT control, education platform, all-in-one conference machine, digital twin and other products

Smart office R&D center

Focus on intelligent paperless conference, speech transcription, AI text-to-speech simultaneous interpretation and other platform systems, and open AI large model engine customization service

Smart vision R&D center

Focus on visual technology research and development and product development, including image analysis, visual large models, streaming media, visual tracking and positioning and other related technologies and products

Content management platform R&D center

Focus on the research and development of related technologies and products such as content management system, smart class information board, venue management, Baicheng vision, scenario-based commercial display SaaS cloud platform, etc.

Conference platform R&D center

Focuses on intelligent and integrated management of meetings, offering a cloud-based conference management platform covering all scenarios before, during, and after the meeting, as well as a visual IoT management platform for meetings

Fusion communications R&D center

Focus on video conference, video intercom, converged gateway and other products

Visual management platform R&D center

Focus on visual management integrated management platform, AI edge computing and other products

Acoustics R&D center

Focus on the research and application of cutting-edge audio technology products, formulation and development of electroacoustic and architectural acoustic solutions, and debugging and delivery of professional sound reinforcement systems

LED display R&D center

Focus on high-quality LED large-screen R&D and FPGA design, providing professional customized design services

Smart lighting R&D center

Focus on the design and development of stage lighting, cultural and tourism lighting, professional lighting, smart power and other products, as well as audio-visual TV interaction and visual IoT integrated management platform

Stage machinery R&D center

Focus on the research and development of conventional and non-standard stage machinery on and off the stage, and provide feasibility analysis

Medical informatization R&D center

Focus on the design and development of medical information products such as medical triage, smart wards, ICU visits, and video conference

R&D: INTELLECTUAL PROPERTY

itc owns **3,481** intellectual property rights, including **234** invention patents, **1,320** utility model patents, **153** design patents, and **1,774** software copyrights.

R&D: LIST SOME TECHNICAL HIGHLIGHTS

Digital amplifier

- Audio-specific switched power supply technology
- Switched power supply technology
- Broadcast digital amplifier technology
- IR2092 digital amplifier technology
- IR20957 digital amplifier technology
- IR2461 digital amplifier technology
- Digital power amplifier adaptive variable modulation frequency and automatic stabilization technology
- Professional high power digital amplifier technology
- Digital amplifier parallel technology
- Broadcast switched power supply digital amplifier technology

Video technology

- ◆ Image 3A algorithm processing technology
- ◆ ISP optical image processing technology
- ◆ PTZ pan/tilt control technology
- ◆ Video transmission technology
- ◆ Video encoding and decoding technology
- ◆ Visual tracking algorithm
- ◆ Network packet loss processing algorithm
- ◆ Streaming media technology
- ◆ Network jitter processing algorithm
- ◆ Video image processing technology
- ◆ Video matting processing technology
- ◆ Virtual video fusion technology

Power technology

- ◆ Flyback power supply technology
- ◆ Half-bridge power supply technology
- ◆ Forward power supply technology,
- ◆ Half-bridge soft switching technology,
- ◆ High power active clamp flyback power supply technology
- ◆ LLC power supply technology
- ◆ Full-bridge power supply technology

IoT technology

- Sensor Technology
- Embedded System Technology
- Network transmission technology
- Cloud service application technology

AI algorithm analysis technology

- ◆ AI image analysis technology
- ◆ AI speech transcription technology
- ◆ AI face recognition technology
- ◆ Personal behavior recognition technology
- ◆ AI voice interaction technology
- ◆ AI machine translation technology
- ◆ AI voice simultaneous interpretation technology
- ◆ Speech semantic segmentation technology

LED lighting technology

- ◆ Optical design
- ◆ Heat dissipation technology
- ◆ Low-power power supply design technology
- ◆ High-density and high-layer PCB design technology
- ◆ LED drive technology
- ◆ FPGA communication technology
- ◆ FPGA encoding and decoding technology
- ◆ FPGA image processing technology
- ◆ Mechanical transmission and control technology
- ◆ LED optoelectronic technology
- ◆ Industrial communication technology

Wireless technology

- 5G transmission technology
- Wi-Fi6 transmission technology
- Infrared DQPSK international
- Audio algorithm
- Wireless automatic frequency hopping algorithm
- NB-IoT technology
- Zigbee technology
- Digital U-segment audio transmission
- WIFI6 audio transmission

Digital matrix

- Large-scale high-speed circuit design
- FPGA encoding and decoding technology
- FPGA optical signal transmission technology
- High-speed backplane design
- Large-scale host structure design
- Host heat dissipation design

Audio technology

- ◆ Audio transmission technology
- ◆ Audio codec technology
- ◆ Network communication technology
- ◆ Audio processing technology
- ◆ Audio synchronization technology
- ◆ Network communication technology
- ◆ Ring network seamless dual link technology
- ◆ AGC pickup technology
- ◆ Audio matrix switching scheduling technology
- ◆ Intercom transfer technology
- ◆ FPGA audio processing technology
- ◆ Speech semantic segmentation
- ◆ Intelligent mixing algorithm
- ◆ Feedback suppression algorithm
- ◆ Real-time DSP audio processing architecture

R&D: INDUSTRY STANDARD SETTING

The company has lead the development of **18** industry standards, including the *Technical Specifications for Subway Digital PA Systems, General Technical Specifications for Digital PA Systems, General Technical Specifications for Classroom Sound Reinforcement Systems, and Quality Control Standards for the Production of Audio Power Amplifiers.*

It has also participated in the formulation of national, local, and industry standards, including **3** national standards, **1** local standard, and **1** industry standard.

The company's product technology has been recognized for "High-Quality Ultra-Long-Distance Audio Transmission, Key Technologies Research and Application for Intelligent Rail Transit Broadcasting Systems," which won the **2022 Guangdong Province Electronic Information Science and Technology Progress First Prize**. The "Development and Industrialization of High-Reusability AI Intelligent Interactive Flat Panel" was also recognized for its achievements and rated at the **international advanced level**.

The company **successfully "took the lead"** in a key project under the **Standardization Support for High-Quality Development of Manufacturing Industry**.

Production Strength

PRODUCTION: INTELLIGENT PRODUCTION BASE

The new industrial park ($\geq 300,000\text{sqm}$) is an efficient modern factory integrating automation, informatization, and automated manufacturing. It will quadruple the existing production capacity. The new factory fully introduces refined production lines, DIP plug-ins, VGA smart wallets, and smart logistics, Kanban management, etc., to improve product production efficiency and ensure product consistency and product quality stability throughout the production process.

PRODUCTION: FULLY AUTOMATIC REFINED PRODUCTION LINE

Raw material testing

SMT lamp bead mounter

Housing design

It has the largest product equipment manufacturing center in the industry, has formed a whole-process quality control system from SMT patching, automatic plug-in, wave soldering, debugging, assembly, aging, packaging to initial adjustment, re-adjustment, joint debugging and testing of products. Complete manufacturing and processing chain system, For all core components, we only cooperate with the best suppliers in the industry. In order to improve product quality and ensure delivery time, we have invested heavily in setting up processing centers for hardware panels, structural parts, transformers, wires, cabinets, etc. to fully cope with the diversification of small quantities in the market. , specialization and other various needs.

PRODUCTION: QUALITY TESTING LABORATORY

LED testing

Anti-UV testing

Waterproof testing

Aging test

High-standard testing laboratory: high and low temperature, constant temperature and humidity, integrating sphere, ultrasonic layer scanner and other comprehensive precision instrument inspections with up to 50 processes ensure the stability and reliability of the products and guarantee a 100% pass rate.

PRODUCTION: PRODUCT QUALITY MANAGEMENT

CMMI5
Certification

ISO Quality
Management System

Weapon Equipment Quality
Management System

Information Security
Management System

RoHS
Certification

From research and development, design, production, to delivery, the company implements a full-cycle quality management system to ensure comprehensive control over the entire process, laying a solid foundation for the enterprise's high-quality development. The company has obtained certifications for the ISO9001 Quality Management System, ISO14001 Environmental Management System, ISO20000 Information Technology Service Management System, Weapons Equipment Quality Management System, and Information Security Management System. In 2023, under the guidance of the district Market Supervision Administration, we fully introduced the Excellence Performance Management Model and are striving to win the Guangdong Provincial Governor's Quality Award and the Guangzhou Municipal Mayor's Quality Award.

PRODUCTION: QUALIFICATION CERTIFICATION

System Certification

In terms of system certification: itc has 26 major system certification certificates, covering multiple key areas such as quality, environmental protection, corporate reputation, service guarantee, technological innovation and intellectual property rights.

Quality

Environmental Protection

Reputation

Services

Protection

Technology

Property rights

System design and construction level certification

Professional system engineering: itc has comprehensive grade certification and construction qualifications from design to installation, commissioning and service. In the construction process of systems such as stage lighting, machinery, professional sound reinforcement and LED, itc can well help and serve customers to complete the professional construction of the project.

Stage lighting system

System integration

Stage mechanical system

LED system

Professional speaker system

Product certification

In terms of product certification: all itc products have passed the national compulsory certification and the certification required by the relevant industries, such as EU EN54-16 fire protection certification, explosion-proof certification, classification society certification, etc.

Design Strength

DESIGN STRENGTH

Strong Design Ability

- ① Powerful project system integration design ability, including drawing layout, drawing wiring, system diagram, EASE modeling, project bidding, budget preparation, project planning, etc.
 - ② Word version of the program supporting design instructions
 - ③ PPT version of the program supporting design instructions
 - ④ Massive effect picture library, support free scene customized effect pictures, attached files
 - ⑤ Construction reference, decoration suggestion
 - ⑥ Strong support from professional team
- Advanced products and system solutions!!

Service Guarantee

SERVICE: COMPLETE SERVICE SYSTEM

We will do all the scheme design + project debugging + user training + after-sales service

Pre-sales

120 marketing engineers

- ✓ 8,000 online and offline product promotion training sessions each year
- ✓ 200 exhibition promotion sessions all over the world

On-sales

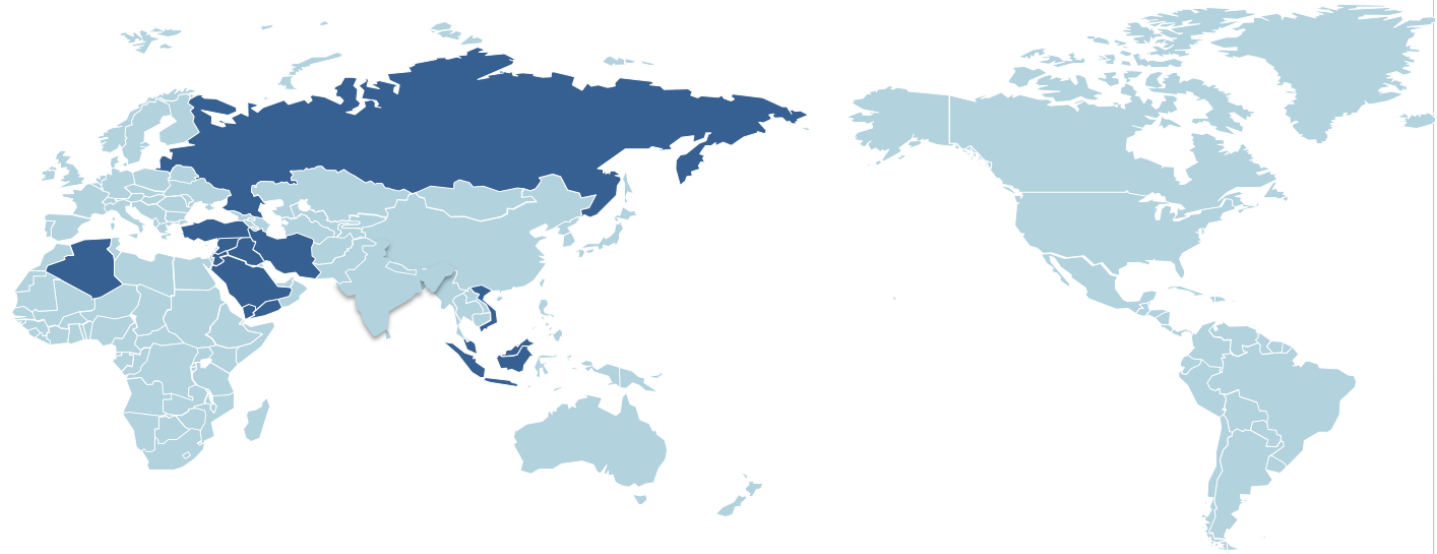

600 design engineers

- ✓ 300,000 design plans per year
- ✓ 50,000 project sound field analysis and construction drawings
- ✓ 20,000 scene renderings

After-sales

600 after-sales service engineers

- ✓ door-to-door service worldwide
- ✓ 24-hour customer service to answer questions
- ✓ On-site support for major events and important activities

SERVICE: TALENT DEVELOPMENT

Occupational skill level certification

In terms of professional skill level certification, in 2019, itc successfully obtained the professional skill level certification qualifications for **four occupations (network and information security administrator, electronic special equipment installer, Internet of Things installation and debugging technician, and electronic product new version worker)** authorized by the Guangzhou Vocational Competence Certification Guidance Center.

广州市职业能力建设指导中心

穗人社职建函〔2023〕121号

关于同意广东保伦电子股份有限公司开展企业职业技能等级认定工作的函

广东保伦电子股份有限公司：

根据《广州市人力资源和社会保障局关于开展广州市企业职业技能等级认定工作的通知》（穗人社函〔2022〕131号）和《关于简化企业申请职业技能等级认定备案材料的通知》（粤技服〔2021〕157号）和《广州市人力资源和社会保障局关于公布广州市第十一批企业职业技能等级认定机构名单的通知》（穗人社函〔2023〕316号）要求，同意你单位开展企业职业技能等级认定工作。机构备案号为Y000044012197，有效期为3年，开展职业（工种）目录见附件。

附件：职业技能等级认定职业（工种）目录

职业技能等级认定职业（工种）目录

序号	职业名称	职业编码	工种名称	技能等级
1	网络与信息安全管理 员	4-04-04-02	网络安全管 理员	4、3
2	电子专用设备装调工	6-21-04-01		5、4、3
3	物联网安装调试员	6-25-04-09		5、4、3
4	电子产品制版工	6-25-01-12		5、4、3

- Internally: professional vocational skills training and assessment before taking up a post.

Professional qualification certificate

Technical titles include **senior system architecture designer, senior information system project manager, senior software testing engineer, intermediate system integration project management engineer, mechanical design and manufacturing assistant engineer, intermediate software designer, etc.**

- Externally: Provide professional training of skilled personnel for industry integrated customers.
