

Feature:

- * Low-power design, no refresh rate when the screen is still, and the camera will not flicker when recording videos.
- * Adopt high-quality aluminum material and CNC fine carving processing, the display frame is an overall CNC molding of aluminum alloy and is only 7.7mm thick; the all-aluminum structure makes the device as a whole lightweight, exquisite and beautiful.
- * The surface of the device is anodized, bright in color; it also supports sandblasting, wire drawing and other processes; various custom colors are optional.
- * Support connecting to an Android mobile phone via Bluetooth, making it easy to change information.
- * Support image transfer through NFC on Android phones.

Specification:

Model	TS-8209F
Dual screen	Touch not supported
Main screen size	7.5 inches
Main screen resolution	800*480
DPI	127
Supported color	Black, White, Red
Viewing angle	85/85/85/85
Glass	Ultra-clear glass + chemical tempering
Frame color	Silver aluminum
Working temperature	0°C~35°C
Storage temperature	-25°C~60°C
Battery life	Built-in 5# Nanfu alkaline battery, support 1-year use when fully charged
Power consumption	Working current 50mA; standby current < 0.2mA
Image transfer mode 1	Send images through NFC in the center of the display.
Image transfer mode 2	Send images via bluetooth; the best transmission distance is 0-5m.
Operating system	Android and Harmony system mobile phones; Apple mobile phones that do not support IOS
Dimension	208*149.4*44mm
Weight	528.9g
