

Description

The smart electronic nameplate adopts double-sided 7-inch LCD screen design, built-in high-performance processor and processing software. It can simultaneously display logo, background image, background color, department, name, position and other participant information. With conventional conference service function, it can satisfy diverse conference demands and improve conference efficiency. In addition, it adopts professional and stylish UI design to greatly simplify the usage steps and provide new conference experience.

Feature

- * Dual 7-inch IPS full-view HD screens, exquisite UI design of Android system, the first-rate user experience.
- * Quad-core CortexTM-A35 architecture processor and Android 8.0 system.
- * Support electronic nameplate display function, with the selection of 11 fonts and free setting of color and font size, local input method; customize nameplate through the web, support pictures and multiple fonts.
- * Support a variety of nameplate background templates, which can also be customized by importing national emblems and pictures.
- * Support conference information display; the information (such as conference theme, time, place, attendees, etc.) issued by the server can be previewed.
- * Support display of device status, including ID, IP, MAC, network connection status, server connection status, device power, name, unit, position, semaphore, etc.
- * Support C/S management and control structure. The conference theme, nameplate background, and nameplate information can be delivered uniformly through the web terminal(web page). We can click to view or preview them on the homepage. Support the control of unified shutdown.
- * Support multiple services (coffee, tea, water, microphone, flower, paper, pen, manual service, etc.); the logistical personnel can check the service demands of participants through the web terminal (web page)
- * Support offline local editing of person name information, font size, background color, local background image, and support center, left, and right alignment. Support free layout of text placement.
- * Support internal short message communication between electronic table and card equipment in the conference room, and support text sending function.
- * Support meeting sign-in, and can display the name of the person to confirm the sign-in.
- * Support meeting voting, you can view the current voting description details to vote.
- * The system supports internal language switching among Chinese, English and Russian to meet the needs of different scenarios.

Specification

Operating system	Android 8.0 system
Memory	2G/8G
Power supply	Battery powered, Battery powered; with TYPE-C interface, supports fast charging
Battery capacity	18000Amh (one year warranty for integrated battery)
Wireless frequency	2.4GHz
Color	silver
Display	7-inch HD IPS display
Installation method	Desktop
Dimensions (L×W×H)mm	117×68×108mm
Weight	1.26kg (including battery)
Maximum power consumption	3.5W
Screen Resolution	1024×3(RGB)×600
