

Smart Double-sided Electronic Nameplate

TS-8209GWP

Description:

The smart electronic nameplate adopts double-sided 7-inch LCD screen design, built-in high-performance processor and processing software. It can simultaneously display logo, background image, background color, department, name, position and other participant information. With conventional conference service function, it can satisfy diverse conference demands and improve conference efficiency. In addition, it adopts professional and stylish UI design to greatly simplify the usage steps and provide new conference experience.

Feature:

- * Dual 7-inch IPS full-view HD screens, exquisite UI design of Android system, the first-rate user experience.
- * Quad-core CortexTM-A35 architecture processor and Android 8.0 system.
- * Support electronic nameplate display function, with the selection of 11 fonts and free setting of color and font size, local input method; customize nameplate through the web, support pictures and multiple fonts.
- * Support a variety of nameplate background templates, which can also be customized by importing national emblems and pictures.
- * Supports display of conference information, and can preview part of the conference information sent by the server (such as conference name, slogan, content, participants, etc.).
- * Supports display of device status, including ID, IP, MAC, network connection status, server connection status, device power, name, unit, position, semaphore, etc.
- * Supports C/S management and control architecture, and can uniformly send conference theme, nameplate background and nameplate information through the client, which can be clicked to view or previewed on the main page, and supports unified control of shutdown.
- * Supports multiple service call functions (coffee, tea, water, microphone, paper, pen, manual service, custom others, etc.); view the service needs of participants through the client.
- * Supports offline local editing of name information, font size, background color, local background image, and supports center, left, and right alignment. Supports free layout of text placement.
- * Supports internal short message communication between electronic table card devices in the conference room, and supports text sending function.
- * Supports meeting sign-in, and can display the name of the person to confirm the sign-in.
- * Support conference voting, you can view the current voting description details to vote.
- * The system internally supports switching between Chinese, English, and Russian languages to meet the needs of different scenarios.

Specifications:

Operating system	Android 8.0 system
Memory	2G/8G
Power supply	POE power supply, 36V-57V
Working time	12 hours
Installation method	Desktop
Color	Silver
Display	7-inch HD IPS display
Power consumption	5.5W
Installation method	Desktop
Dimension	175×68×117.11mm
Weight	0.96kg
Screen resolution	1024×3(RGB)×600
