

# Paperless Conference Information Release Terminal

## TS-8330

### Description:

The external screen of the waiting room information release terminal allows participants to keep abreast of the conference process and prepare for the conference well. When the conference administrator click "start" or "prepare" on the topic management interface, the corresponding prompt page of "start" (or "prepare") will be displayed on the waiting screen in real time, and voice broadcast is supported.

### Feature:

- \* With 1 HDMI output port, connected to HD screen with 1080P resolution.
- \* With 1 USB port, connected to touch screen/mouse/keyboard for convenient management and control.
- \* Support gigabit network port and POE power supply.
- \* Support information display during the conference, turn up and down the pages.
- \* Support displaying the conference topic information, including the topic name, start time, participant information and status of the topic (not started, in progress, to be started, ended).
- \* Support displaying conference status and notices in advance or in real time.
- \* Support synchronous voice broadcast of conference topics.

### Specifications:

Model	TS-8330
CPU	RK3288 4-core A17
Clock speed	Max1.8GHz
DDR3	2G
EMMC	16G
Network port	RJ45Gigabit Ethernet port ×1, support POE power supply
OTG port	1,support 5V power supply
USB 2.0	1
Infrared signal output	Support 1 infrared signal output
Infrared learning	Built-in infrared receiver, support infrared learning function
1-channel relay	Support 1 relay control signal trigger
1 channel IO	Support 1 IO input signal trigger
Video output	HDMI port, max 1080P
Power consumption	5W
Dimension	132×83×28.5mm (L×W×H)
Weight	0.3kg
