

Description

The waiting conference information release terminal is connected to an external display screen, which allows the participants in the waiting room to view the progress of the conference in a timely manner. When the administrator clicks to start or prepare a conference topic on the paperless topic management interface, the waiting conference screen will display the start (or preparation) prompt page of the corresponding topic in real time, which also supports voice reading and broadcasting.

Feature

- * With 1 HDMI output interface, it can be connected to an external HD display with 1080P resolution.
- * With 4 USB interfaces, it can be connected with external touch screens/mouses/keyboards, which is convenient for management and control.
- * Support the information display of ongoing conferences.
- * Supports the display of conference topic list information, including topic name, start time, participants and topic status (not started, ongoing, about to start).
- * Supports advance and real-time display of conference status and notifications for synchronous paperless conference topics.
- * Support synchronous voice broadcasting of conference topics.

Specification

Model	TS-8330A
CPU	Rockchip 3288W, quad-core cortex A17
Graphics card	Mali-T764
Memory	2G
Storage	eMMC 16G
WiFi/BT	Ap6236
Device interface	1*DC IN; 1*RJ45; 1*HDMI2.0; 1*VGA; 1*WIFI/BT ANT, 1*Line Out 3.5mm; 1*TF Slot, 4*USB2.0; 1*Miro USB
Power supply	12V DC
Working temperature	0°C~45°C
Storage temperature	-20°C~70°C
Relative humidity	10%~90% (no condensation)
Weight	0.53kg
Dimension (L*W*H))	125*126*31mm
