

# Wireless Voting System Controller

## TS-W205

### Feature:

- \* Wall-mounted installation, easy and convenient.
- \* Each base station can manage 50 or 100 wireless voting devices; the default is 50(setting of 100 devices will slow down the data statistics speed about 1.5 seconds).
- \* 50-meter wireless RF communication range.
- \* 31 communication channels are optional.
- \* Base station has IP address and can be connected with control computer for remote control through advanced TCP/IP protocols.
- \* External power supply or POE power supply are optional.
- \* It can extend 31 base stations to connect computers, and can support up to 2000 wireless voting devices.

### Specifications:

Model	TS-W205
Frequency range	410MHz-525MHz
Maximum capacity	31
Reception capacity	50 voting devices by default and 100 devices maximum
Channel	31
Transmitting power	100mW
Transmitting distance	50m
Power supply	Compatible with DC12V and standard POE power supply
Dimension	220×120×32 mm
Working temperature	-10°C ~ 45°C
