

Scene Control Extension Box

TR-0740C

Description:

The scene control extension box supports automatic acquisition of IP address to realize intelligent network control. Small body, easy to carry, can be installed on the back of the entrance screen.

Feature:

- * Protocol compatibility: used with programmable central controller; support third-party device control.
- * With 1 weak current relay control interface.
- * With 1 digital I/O input and output control port, with protection circuit.
- * With a reset button, support factory reset function.
- * With indicator lights. Red light indicates the running status, and blue light indicates the power on/off status.
- * Support two power supply modes: DC12V power supply, and 100M POE power supply (standard POE protocol).
- * Support DHCP, device network address automatic identification and batch IP information change.
- * Network control: support remote control via Ethernet
- * Convenient installation, 360° installation and suspension, vertical or horizontal installation.

Specifications:

Model	TR-0740C
Processor	32-bit Cortex-M3 ARM architecture embedded processor
Interface	1 weak current relay, 1 I/O port
Control method	Internet
Power supply	DC12V power supply or POE power supply
Dimension	132×83×26mm
Installation method	Vertical or horizontal installation
Power consumption	1.2W (MAX)
