

Color Touch Screen TS-9110C

New central control editing software V1.0

Description

The 10.1-inch desktop central control touch screen is developed based on the Android system. It can be used with the central control system, and used in various high-end conference rooms, control centers and other occasions.

Feature

- * The desktop design makes the operation more convenient; the user-friendly inclined panel display makes the content more intuitive.
- * Integrated 10.1-inch capacitive touch screen, built-in Android 8.1 system, support the installation of third-party conference control applications to control conferences or terminals.
- * Support various power supply methods such as power adapter and POE power supply to meet different needs.
- * Integrate a high SNR array microphone and a high-fidelity speaker, and connect to a computer, terminal, mobile phone through the USB interface to meet the audio collection and playback requirements during audiovisual communication.

Specification

CPU	Quad-core Cortex-A35 architecture, clocked at 1.2GHz
RAM	2GB
Storage	8GB
Operating system	Android 8.1
Display screen	HD IPS screen
Resolution	1280*800
Viewing angle	170°
Screen ratio	16:9
Touch screen	10.1-inch capacitive touch screen, support 10-point touch
USB interface	2 x Type-C
Network interface	1 x Rj45
Bluetooth	BT5.0
Audio interface	2 x 3.5mm audio interfaces
Speaker	2*5W
Video interface	1*HDMI
Power supply	Support POE/DC12V power supply
Maximum power consumption	36W
Dimension	244×74×176mm (W×H×D)
Working temperature	0~40°C
Weight	1.075kg
