

### Description

- \* The speaker is made of 15mm U-shaped integrated board, the surface is dark red, pasted with natural walnut veneer, and sprayed with PU matt open paint, front decorative panel is sprayed with black matt paint, the grille adopts iron-absorbing installation method, and the treble and the top of the speaker are decorated with brushed aluminum panels. The overall appearance is simple and elegant.
- \* The mid and bass reflectors are solid aluminum bullets to enhance the accuracy of the phase and assist in heat dissipation.
- \* The bottom of the speaker adopts height-adjustable metal foot nails to absorb shock and stabilize, and enhance low-frequency diffusion.
- \* The treble is made of aluminum sound film, and its sound is bright and translucent, with high resolution.
- \* The mid and bass are made of glass fiber woven cones, which have wide frequency response and low distortion, producing natural mid frequencies and deep low frequencies. The transients are good and the effect of playing large dynamic music is excellent.

### Specification

Model	CK-6503H
Acoustic system	Three-way 5-unit, front-inverted structure
Rated power	300W (MAX)
Nominal impedance	8Ω
Frequency response	40Hz-20KHz@-10db
Sensitivity	90dB±3/1M/1W
Speaker unit	6.5"bass × 3 + 6.5" mid × 1 + 25 core tweeter × 1
Net weight	25.7KG
Dimensions (H×W×D)	1075×241×388 mm
