

Outdoor All-weather Waterproof Speaker

KP-115HT

Feature:

- * Engineering plastic injection molding cabinet, good weather resistance, high strength, and light weight.
- * The coaxial structure design of an efficient 15-inch mid-woofer and a 44-core compressed driver.
- * High sensitivity, high power, long transmission distance.
- * Steel surface mesh, built-in three layers of mesh cloth and acoustic cotton with breathable and waterproof functions, in accord with IP56 International standard.
- * Equipped with a standard hanger with galvanized steel spraying treatment and matching stainless steel screws and safety ropes, which are convenient and safe to install.
- * It is mainly used in school playgrounds, theme parks, cultural squares, stadiums, etc.

Specification:

Model	KP-115HT
Frequency response	50Hz ~ 18KHz@-10d
Rated power	75W, 150W, 300W/100V, 400W/8Ω optional
Peak power	1200W
Max SPL(rated/peak)	127dB/134dB
Sensitivity	103dB±3dB@(1W/1m)
Coverage angle	(H)90°(V)90°
Speaker unit	15" woofer ×1, 1.7" compressed tweeter ×1
Dimension	500×500×520mm
Weight	27Kg
