

Description

Suitable for outdoor performances, stadiums, large multi-functional halls, auditoriums and professional sound reinforcement, etc.

Feature

- * Uses two 15-inch mid-woofer units and one 75mm compressed neodymium tweeter unit.
- * The cabinet is made of 15mm birch wood, which is light in weight, veneered and covered with dust-proof mesh cotton inside.
- * The appearance adopts a waterproof design of flight case structure, and comes with moving pulleys for easy transportation.
- * The frequency divider in precise design optimizes power response and the medium frequency performance of the vocal.
- * Professional aviation sockets and plugs with good electrical characteristics.

Specification

Impedance	4Ω
Frequency response	38Hz-20KHz
Rated power	1000W
Peak power	4000W
Sensitivity	100dB/W/M
Maximum SPL(rated/peak)	130dB/136dB
Coverage angle	(H)100°(V)80°
Treble	75mm compression neodymium tweeter × 1
Bass	15" bass × 2
Dimensions (H×W×D)	1243×539×639 mm
Weight	68kg
