

Description

It is a high-performance in-line professional audio DI box, full-range passive DI, which can independently isolate the noise caused by the ground loop. It is characterized by low noise floor, stable operation, and pure sound quality, so as to protect the safety of equipment. It is suitable for live performances, theaters, musical instruments, pro band performances, engineering customization, etc.

Specification

| | |
|-----------------------------|--|
| Model | T-DI1 |
| Input | 1 TRS input |
| output | 1 TRS direct output, 1 XLR signal output |
| Input impedance | Unbalanced 220K Ω |
| Output impedance | Balanced 600 Ω |
| Frequency response | 10Hz~60kHz (+/-3dB) |
| Linear performance | 20Hz~20kHz (+/-0.12dB) |
| THD | 0.004%@1kHz;0.06%@20Hz |
| Phase distortion | 1° @100Hz; 11 °@20Hz |
| Max input voltage | 3.12 Volts RMS (9V peak) |
| Power consumption | 200mw |
| Working temperature | 10°-55°C |
| Product size (L×H×D) | 120.5×82×44.2mm |
| Package size (L×H×D) | 165×105×85mm |
| Net weight | 0.6kg |
| Gross weight | 0.7kg |
