

## Description

It is a high-performance in-line professional audio DI box, full-range passive DI, which can independently isolate the noise caused by the ground loop. It is characterized by low noise floor, stable operation, and pure sound quality, so as to protect the safety of equipment. It is suitable for live performances, theaters, musical instruments, pro band performances, engineering customization, etc.

## Specification

Model	T-DI2
Input	2 TRS inputs
output	2 TRS direct outputs, 2 XLR signal outputs
Frequency response	20Hz~20kHz
Dynamic range	109dB
Noise floor	Below 0dB -99dB
Equivalent input noise	-103dB
Maximum input	+10dB
Phase deviation	1KHz=0°; 20KHz=-1°
Power consumption	200mw
Working temperature	10°-55°C
Product size (L×H×D)	120.5×82×44.2mm
Package size (L×H×D)	165×105×85mm
Net weight	0.5kg
Gross weight	0.6kg
