

Light processor

YK-DG00

Description

An intelligent lighting effect processor that supports the linkage of third-party lighting equipment. It can be seamlessly connected with the YK-PT00 to realize the linkage effect of "light moves with sound".

Feature

- * Support the signal recording function of the lighting console, which is convenient for making lighting special effects.
- * Support light parallel control switching, users can actively switch to light console control.
- * With 2 DMX512 inputs, it can be connected to mainstream lighting consoles.
- * With 2 channels of DMX512 output, a total of 1024 channels of lighting control.
- * Support up to 12 devices access, and support up to 12288 lighting control channels.
- * Support OSC and UDP protocols, and can seamlessly connect with YK-PT00.

Specification

Model	YK-DG00
Processor	2core Cortex-A7@800Mhz ; 1core Cortex-M4@209Mhz
Storage	1GB DDR3 , 8GB EMMC
Control protocol	UDP , OSC
Interface	2*XLR(M) , 2*XLR(F) , 2*USB2.0 , 1*RJ45
Power supply	DC12V-2A
Weight	2.2kg
Dimensions (WxDxH)	485mm*220mm*45mm
