

Desktop Socket

TS-18A

Note:

- * Avoid water seepage and knocking.
- * It is not suitable to be installed outdoors and on the ground.
- * Ground wire is required.

Description:

This is a pop-up desktop socket. The hidden desktop socket series provides users with a simple and beautiful connection solution of signal and power. It can connect audio, video, computer video, network, telephone, power supply and VGA signal cable to the computer, which is convenient and user-friendly. When in use, press the panel lightly to release the mechanical locker. And the connection box is smoothly uncovered by the air-supported structure. After the socket completely goes up, users can select the port to connect to the device. After that, press the cover lightly and the mechanical locker will immediately lock the box. The locked box keeps flush with the desktop, and all the ports are perfectly hidden, making the surface neat and beautiful.

Feature:

- * The socket adopts all-aluminum structure, high-quality aluminum and CNC engraving craft. The whole socket panel is a one-piece CNC molding of the aluminum alloy, which is neat and elegant.
- * The surface of the device is anodized, looks bright, and can be sandblasting, wire-drawing, etc.
- * The information module port adopts standard modules, with strong signal and good quality.
- * The information port adopts high-grade configuration, and is closely connected with the desktop.
- * It is mainly used for manager tables, conference tables and other office furniture.

Specification:

Model	TS-18A
Power supply	AC 220V 50-60/HZ
Pop-up method	Air-supported pole
Elevation angle	45 degrees, fully accord with engineering principles
Overall weight	2.0Kg
Product size	175×130×145mm
Panel size	175×130×2mm
Box size	166×120mm
Desktop opening size	166 × 122mm (through hole, recommended to open hole according to the actual product)
Environment conditions	-20 ° C ~ 50 ° C humidity ≤ 70%
Configuration port	One multi-function power supply, network, 3.5 audio, data USB, HDMI, VGA
