

Microphone

TV-S63WB

Description:

TV-S63WB is a professional USB high-definition omnidirectional microphone with 3 built-in microphones, and supports wireless 2.4G for easy remote communication anytime and anywhere. Equipped with brand-new network conference system, powerful function and easy operation; applying the five advanced voice processing technologies of Income International, with clear and beautiful sound quality, the intelligent noise reduction completely eliminates the noise, and the voice restoration is highly fidelity; stylish shell-shaped design, easy to carry, fully meet the needs of remote conference communication in business, office, and travel scenarios.

Feature

- * 48K ultra-wideband voice call HD technology, full-duplex deep echo cancellation, intelligent microphone mixing, dynamic noise suppression, automatic gain control
- * Cooperate with hardware video conference terminal and software video conference terminal to realize various cloud video/network conferences and UC unified communication.
- * Built-in multiple high-sensitivity microphones to form 360-degree sound pickup with pickup radius of 3 meters.
- * Support USB and analog audio (LINE IN/OUT) communication.
- * Support wireless 5.8G audio transmission, without any cable connection to video terminals, conference tablets and other communication equipment.
- * Collaborative office function: support video conferences and teleconferences microphone mixing at the same time to achieve multi-party calls.
- * Speaker volume reaches 86dB, and supports 16 levels digital adjustment.
- * Support off-hook, on-hook, microphone mute, volume increase and decrease, speaker mute and other key functions.
- * Support headphone function for private conversation.
- * With 5 function button indicators: circular working status indicator, volume status indicator, wireless receiving status indicator, power switch/charging status indicator.

Specification:

Model	TV-S63WB
Two-way noise compression (NC)	Noise compression reaches 18dB
Echo length	≥500ms
Bidirectional noise compression (NC)	90dB
Pickup Smart mic automatic direction finding technology (EMI)	Support
Automatic gain control (AGC)	Support
Microphone pickup range	3 meters, 360 degree full range
Mic/speaker frequency response	100Hz-22KHz
Support system	Windows 10, Windows Vista, Windows 7, Windows 8, Mac OS X, Android
Interface Type	USB data and charging; USB input and output; analog audio interface: 3.5mm x 1; headphone interface: 3.5mm x1
Pickup distance	3 meters effective sound pickup
Pickup angle	360-degree pickup, no obvious difference in each direction, the level difference does not exceed 3dB
Wireless transmission distance	10m
AEC function	Built-in echo cancellation function
SPEAKER	Built-in speaker, above 85dB adjustable volume. Frequency response 100~22K
Sampling frequency	Support up to 48KHZ sampling frequency, frequency response 100~22KHZ
Automatic gain	Support
Noise suppression	Support
DSP	Frequency 600MHz; RAM 10M; ROM 4M; FLASH 8M
Button	5 laser buttons with LED function, 1 power switch button
Power consumption	Less than 1.5W
Heat dissipation	Shell structure meets the requirements of heat dissipation performance
Operating temperature	0°C ~ 40°C
Operating humidity	20%~80% non-condensing
Dimension (L×W×H)	141mm*42mm
Net weight	0.33kg
Gross weight	0.72kg
