

Feature:

- * Support connecting IP cameras of Hikvision, Dahua, PACOM and public imitation brands that meet the onvif protocol to the distributed system, support 1080P resolution, and support the display of IP camera signal picture on the video wall.
- * Support automatic search and addition of IP camera signals in the same network segment, and support manual addition of camera signals.
- * After the IP camera signal is connected to the distributed system, it can support functions such as picture roaming, splicing, picture scaling up/down, and stretching.
- * Support the storage of IP camera images connected to the distributed system through the storage server.
