

Description:

Connect to the OA system to achieve organizational structure synchronization, personnel synchronization, meeting information synchronization, message notification and other functions, and support embedded OA system to realize meeting appointment, approval and notification functions.

Feature:

- * Quick booking: You can directly initiate a meeting in OA, invite participants, and synchronize the information to the conference system.
- * Conference schedule synchronization: Meetings created in the conference system are automatically synchronized to the OA schedule.
- * Message notification: Notify participants through OA messages to remind them of the meeting time and topic.
- * Basic data synchronization: Automatically synchronize the organizational structure and personnel information of the OA system.
- * Single sign-on: Log in once in the OA system and you can directly enter the conference system without logging in again for verification.
- * Unified identity authentication: The conference system shares the user identity authentication information of the OA system.
