

TR-0645C Information Release Terminal

Embedded software: information release management service software V1.6

Description

Conference information release terminal is used to display conference information pushed by the conference platform, and the occupancy status of the conference room can be checked through the screen; Before the meeting starts, the terminal provides four convenient sign-in methods: scanning QR code, card sign-in, face sign-in and handwriting sign-in, providing a variety of convenient sign-in methods for users to choose from.

Feature

- * 15.6-inch capacitive touch screen, the front is made of fully tempered optical glass, has high light transmittance and anti-explosion performance, support 10-point touch, support 1920x1080 resolution, and has a display ratio of 16:9.
- * Support POE power supply to provide stable power supply for the device.
- * Built-in wide-angle high-definition wide-dynamic camera, which can recognize the faces of 5 people at the same time, providing accurate face recognition function.
- * Built-in card reader makes it convenient for users to use ID cards, access control cards, etc. to swipe cards.
- * Support setting scheduled power on and off and restart tasks in the background, providing convenient management methods.
- * Support batch adjustment of device volume to meet volume requirements in different environments.
- * Support background remote software version update to keep system functions updated and optimized.
- * Support customized display templates, which can easily display weather, LOGO, company name, fonts, forms and other information to meet personalized needs.
- * The simple and elegant interface design enables timely and accurate understanding of the availability and reservation status of the conference room.
- * Support four convenient sign-in methods: scanning QR code, card sign-in, face sign-in and handwriting sign-in, providing a variety of convenient sign-in methods for users to choose from.
- * Support the integration of OA, mobile APP, exchange, etc. to meet the needs of enterprises to maintain their original meeting habits and increase the display of conference room reservation information.
- * Support customization and flexible configuration. The product can be customized to meet various needs through hardware upgrades or additional installations, providing flexible configuration solutions.
- * Built-in relay module supports linkage control of magnetic door lock switch through face recognition.

TR-0645C Information Release Terminal

Embedded software: information release management service software V1.6

Specification

Operating system	Android 8.1.0, support USB upgrade
CPU	RK3288 Quad Core 1.8GHz Cortex-A17
RAM	2GB DDR3
Memory	16GB
Display screen	15.6-inch LED light source, resolution 1920x1080/60HZ, brightness $\geq 250\text{cd/m}^2$ (typ.)
Touch screen	G+G capacitive screen, support 10-point touch mode, response speed $\leq 10\text{ms}$
Camera	Built-in 5 million high-definition anti-exposure camera
Card reader	Built-in IC card reader, support Mifare1/typea/14443a
WIFI	Built-in high-performance SDIO interface WiFi module, supporting IEEE 802.11 b/g/n
RTC real time clock	Support scheduled power on and off
Power supply method	100V~240V,50-60Hz power supply or POE power supply
Interface	USB2.0*2, HDMI*1, RJ45*1, DC12V*1 headphone*1, TF card slot (support up to 128GB TF card)
Video format	Support wmv, avi, flv, rm, rmvb, mpeg, ts, mp4, etc.
Trumpet	Built-in 2W*2 speakers
Power consumption	$\leq 15\text{W}$
Dimensions (L*H*D) mm	385.9*271.8*26.7mm
Material	Metal
Weight	3.1kg
Color	Black
