

True Color Touch Screen

TS-P110T

Description:

4-inch true color display screen, wall-mounted design, embedded Android system, convenient touch operation. Built-in ARM9 core processor, strong processing performance, to meet various program operation requirements. It communicates and interacts with the microphone processor through the RS-485 protocol to realize the voice control and on-site debugging requirements of the hanging microphone.

Specifications:

Model	TS-P110T
Display screen	4-inch capacitive touch screen
Resolution	480*480
Interface	Industry Standard Terminal Blocks
Transfer protocol	RS-485
Working temperature	-10°C~45°C
Relative humidity	20%~80%, no condensation
Power voltage	DC24V
Dimension	86*86*35mm
Weight	0.2Kg
