

Speech Transcription Server

TS-8511

Description

The speech transcription server uses a large-scale language model to intelligently predict the context, provide intelligent sentence segmentation and punctuation predictions, and format numbers, dates, and times in the results into regular text. It can provide real-time subtitles in the process of meeting or teaching, realizing the effect of live streaming. In this way, it greatly satisfy the needs of modern office/teaching for energy saving, environmental protection and convenient operation.

Specification

Model	TS-8511
CPU	Core i3 quad core
Memory	DDR4 16GB
Hard disk	SSD 256G
Network card	2×Gigabit network card
Video output interface	1×HDMI, 1×DP
Others	2×USB2.0, 2×USB3.0, 1×MIC in, 1×Line out, 1×Reset
Cabinet	1U rack mount
Dimension	450×430×44mm
Working environment	0°C-60°C, 5%~95% (no condensation)
Power supply	AC100-240V 250W
