

Speech Transcription Server

TS-8611-16

Description:

The speech recognition engine server meets the needs of modern meeting rooms for energy saving, environmental protection and operational convenience. It adopts large-scale language models to realize smart context prediction and smart segmentation and punctuation. It can format the result content of numbers, date, and time into regular text, and can provide real-time subtitles during the meeting to achieve live broadcast effect. It can generate meeting minutes for a maximum of 16 meeting rooms, and realize multi-meeting room transcription solution.

Specification:

Model	TS-8611-16
CPU	Xeon Gold 5218R, CPU clock speed 2.1GHz-4.0GHz, 20 cores and 40 threads
RAM	DDR4 128GB
Hard disk	SSD 256G+Enterprise hard disk 4T
Network card	2*Gigabit LAN
Video output interface	1*VGA
Others	4*2.0USB, 2*3.0USB, 1*serial port
Power consumption	AC 100-240V/500W
Cabinet	2U rack mounted cabinet
Dimension	430×660×88mm (L×W×H)
Ambient temperature	-10°C~50°C
Relative humidity	≤75%
Weight	13.0Kg
