

Description

A 4-inch true color display screen with a wall-mounted design, embedded Android system, and convenient touch control. It is equipped with an ARM9 core processor for robust performance, meeting various program processing requirements. It communicates with the microphone processor via the RS-485 protocol, fulfilling on-site microphone sound control adjustments and debugging needs.

Specification

| | |
|-----------------------|--|
| Display | 4- inch capacitive touch screen |
| Resolution | 480*480 |
| Interface | Industrial standard terminal blocks |
| Transport protocol | RS-485 |
| Operating temperature | -10 °C ~ 45 °C |
| Operating humidity | 20% ~ 80% relative humidity, no condensation |
| Operating voltage | DC24V |
| Dimensions (L*H*W) | 86*86*35mm |
| Weight | 0.2Kg |
