

Description

When used with professional power amplifiers and audio processors, it forms a sound system with perfect sound quality, which is suitable for high-end banquet halls and multi-function halls. When used with subwoofers, it can also be used for outdoor performances.

Features

- *It uses a 15" neodymium woofer unit, an 8" neodymium midrange unit and a 1.7" neodymium compression tweeter.
- *The box is made of 15mm birch, which is light and wear-resistant spray-painted.
- *The large-area bass reflex hole effectively enhances the low-frequency part.
- *It has multiple screw mounting holes and multiple installation methods.

Specification

| | |
|---|------------------------------------|
| Model | TX-1508 |
| Impedence | Bass 8Ω + mid-treble 16Ω |
| Frequency response | 55Hz-20KHz |
| Rated power | Bass 400W + mid-treble 200W |
| Peak power | 2400W |
| Sensitivity | 100dB/W/M |
| Maximum sound pressure level (rated/peak) | 128dB/134dB |
| Coverage angle | (H)60°(V)30° |
| Mid-treble | 8"alto×1+1.7"compression tweeter×1 |
| Bass | 15"woofer×1 |
| Dimensions (H×W×D) | 920×520×445 mm |
| Weight | 33.2Kg |
