

## Description

The main control power board is used to provide power supply for the broadcast controller cabinet and the boards in the cabinet.

## Feature

- \* Provide power supply for the cabinet controller board.
- \* Support the indication of the working state of the board.
- \* Support inspection and maintenance without power off, and the start-stop function on the module is needed.
- \* Support the use of any board position in the broadcast cabinet.
- \* Support 2 power boards in one cabinet at the same time for redundant power supply.

## Specification

Input voltage	AC220-240V 50/60Hz
Maximum input current	0.5A
Fuse	250V 1A, slow
Output voltage	+24V
Maximum output current	3A
Protection mode	Over voltage protection, over current protection, high temperature protection
Size	312.6mm×129mm×30mm
Weight	0.4kg
