

Master Control Power Board

VA-6500C (Specification: CP31)

Description

The master control power board is used in the broadcast controller cabinet to provide power supply for the broadcast controller cabinet and the boards in it.

Feature

- * Provide power for the master control board of the cabinet.
- * Support the indication of the working status of the board.
- * Support uninterrupted power maintenance, and the start-stop function on the module is required.
- * Support plugging and unplugging of any board in the broadcasting cabinet.
- * Support 2 power supply boards inserted in 1 cabinet simultaneously for redundant power supply.

Specification

| | |
|---------------------|---|
| Model | VA-6500C (Cp31) |
| Input voltage | AC 220-240V 50/60Hz |
| Max input current | 0.5A |
| Fuse specifications | 250V 1A Slow Type |
| Output voltage | +24V |
| Max output current | 3A |
| Protection method | Overvoltage protection, overcurrent protection, overheat protection |
| Dimension | 312.6×129×30mm |
| Weight | 0.4kg |
