

Panel T-7772

Description:

It is suitable for ordinary classrooms, multimedia classrooms, offices, conference rooms, prisons, hospital departments, subways and other places to increase external control equipment and expand the functionality of IP network terminals.

Features:

- * Professional integrated IoT type 86 box design, the whole structure is very sturdy.
- * Built-in 4-inch configuration serial port display with 480*480 resolution.
- * Built-in high-performance 32-bit dual-core processor, fast processing speed, stable and so on.
- * Built-in industrial-grade terminal block and IP network terminal real-time communication interface.
- * Support to control the volume control function of wall-mounted IP network terminal.
- * Support MP3 audio files in VOD server or local USB.
- * Password setting: after the lock screen, the login password is required to carry out the corresponding operation setting to prevent other people from operating the setting and other problems.
- * Terminal real-time task terminal: check the status of network tasks currently executed by the terminal.
- * The external control equipment is connected by blue and white cable (24AWG), and the connection distance is ≤ 15 meters.

Specifications:

Model	T-7772
Display screen	4 inch digital true color screen, capacitive touch screen
Display resolution	480*480
Interface	Industry standard terminal blocks
Power Supply	DC 24V
Operating Temperature	-20°C ~ +50°C
Environment Humidity	10%~90%(relative humidity, no condensation)
Weight	0.5kg
