

LED Underground Light

TL-LH6113

Description

LED underground light is widely used for outdoor lighting in squares, parks, leisure places, etc. It is also used for night lighting in park gardens, lawns, courtyards, flower beds, pedestrian streets, waterfalls, fountains and so on.

Features

- * Reasonable heat dissipation design enables the heat of the LED to be quickly conducted through the light structure and ensures its luminous efficiency and service lifespan;
- * The flat glass and stainless steel surface cover are perfectly seamless to avoid dust deposits;
- * The low-gradient surface cover allows pedestrians to walk without obstacles and prevents them from falling;
- * 6063 aviation aluminum extrusion fixture, surface electrostatic spraying treatment, 316 wire-drawing stainless steel surface cover, and ADC12 die-casting aluminum rear cover;
- * 10mm ultra-white tempered glass, with seismic and impact protection grade of IK10, and strong load-bearing capacity.

Specifications

Model	TL-LH6113
Input voltage/power	DC24V/50Hz/9W
Number of LED lamp bead/ light source	Philips/9PCS
Beam angle	15° (30, 45, 60° optional)
Color temperature	3000K (1900, 2100, 4000, 5700K optional)
Control method	/
Installation method	Embedded
IP level	IP67
Fixture size (L×W×H)	D155×105mm
Certificate	CE/ROHS
