

Power Sequencer

T-6216B

Description:

It provides power supply for other equipment in the PA system, and can be combined with the system controller for power-on and power-off management.

Features:

- * Standard cabinet design (2U), black alumina brushed panel, user-friendly drawing, exquisite craftsmanship, high-grade appearance.
- * 16 channels of power output, AC 220V (10A), and the total capacity of power socket reaches 6000 W.
- * Equipped with ship-shaped switch, which can manually control the power-on and power-off of 16 power supplies; it can also be connected with timer and intelligent controller to realize automatic control; CH1 and CH2 channels can be configured in controlled or uncontrolled state.
- * 16 power sockets are turned on at intervals of 1 second in turn.
- * 1 input interface with 24V fire signal, 1 signal output triggered by fire short circuit emergency.

Specifications:

Power supply	AC ~220V 50Hz
Power consumption	50W
Dimension	484×303×88mm
Weight	5.78kg
