

2.4G Microphone

T-538B

Description:

It is suitable for school classrooms, training conferences and other places.

Feature:

- * Transmission frequency: 2.405-2.485GHz, high fidelity, good anti-interference.
- * 64K @16bit×2, HDCD sound quality, the best sound quality.
- * Sound latency (<0.5ms).
- * Response frequency: 80Hz-16KHz.
- * It automatically enters the pairing state when it is turned on. After the pairing is done, a prompt tone will sound and it will automatically enter the receiving state.
- * The connection distance between the controller and the microphone for automatic pairing is 2-5 meters, and the pairing time is 3-15 seconds.
- * To achieve encrypted transmission, the receiver supports automatic frequency sweep function to easily avoid interference.
- * Support volume adjustment function.
- * Support charging function, and charging management, support working while charging, charging through TYPE-C port, with standard charger.
- * The frequency pairing distance (power) can be set by the user.
- * The effective straight-line speech distance can reach 30 meters.

Specification:

Model	T-538B
Transmission frequency	2.405-2.485GHz
Response frequency	80Hz-16KHz
Sound latency	<0.5ms
Pairing mode	Automatic pairing
Pairing distance	2-5 meters
Pairing time	3-15 seconds
