

# Horn Speaker

## T-710G

### Feature

- \* Aluminum structure, waterproof design, the overall style is simple, beautiful and generous, and pays more attention to product function design.
- \* Square horn with large arc design, high sensitivity, high efficiency, round sound amplification, wide sound coverage and long transmission distance.
- \* High-performance magnets and compressed drive heads are used inside, with large sound power output, loud and penetrating sound.
- \* Built-in high-performance 100V audio transformer, which can reduce the loss caused by impedance in the circuit, multiple power options, and flexible wiring methods.
- \* Use high-quality wires for long-term full-load use, anti-scalding, good electrical conductivity, and safe use.
- \* Equipped with a bracket, which is convenient for users to operate, install and debug.

### Application

Suitable for railway stations, bus stations, large squares, etc.

### Specification

Model	T-710G
Rated power (100V)	50W
Rated power (70V)	25W
Frequency response	300Hz-8kHz
Sensitivity	108dB ±3dB
Maximum sound pressure level	125dB ±3dB
Impedance	Black: Com White: 200Ω
Waterproof level	Ip66
Dimension	270×270×340mm
Weight	3.8kg
