

Power Amplifier Isolator

T-650DIS

Description:

T-650DIS is applied to digital power amplifier to isolate noise and provides output isolation for the broadcast system. It is suitable for broadcast systems in clubs, venues, shopping malls and other places that require digital power amplifiers.

Features:

- * With 1-channel 100V constant voltage input and support 100V/120V/240/400V constant voltage output.
- * With output status indicator light display.
- * The output and input channels have high-impedance isolation.
- * Maximum support for docking 650W power amplifier.

Specifications:

Model	T-650DIS
Rated power output	650W
Rated constant voltage output	100V/120V/240/400V
Frequency response	80Hz~16kHz(+1,-3dB)
Dimension	210mm×200mm×83mm
Weight	6.7Kg
