

# 4-channel Signal Amplifier

## TL-LT932

### Feature:

- \* 1 in and 4 out.
- \* Effectively improve the fidelity of DMX signal transmission.
- \* Effectively improve the anti-interference ability of DMX signal.
- \* DMX signal adopts photoelectric isolation technology.
- \* Prevent the mains high voltage from entering the dimming console.
- \* Prevent the lightning high voltage from entering the dimming console.
- \* Improve the safety, stability and reliability of the dimming system.
- \* Wide voltage input, adapt to voltage input of different countries.
- \* Equipped with a 3-pin XLR socket.

### Specifications:

Model	TL-LT932
Input voltage	AC 110-240V 50/60Hz
Power	6W
Power cable	3*0.75mm# European standard plug
Output	DMX512/1990 signal
Fixture size (L×W×H)	250×200×75mm
Package size (L×W×H)	250×200×75mm
Gross weight	1.5kg
Net weight	1.35kg
