

Feature

- * Double protection of stroke limit and mechanical limit.
- * Soft stop and soft start can be realized.
- * Portable installation, no need to make an installation structure on site, and the front and back can be adjusted at will.
- * Using advanced virtual prototype technology to design, analyze and calculate equipment driven by the lift curtain machine and install its accessories without welding.

Specification

Installation method	Hoop installation
Power supply	380V/50Hz
Power	P4/0.75kw
Rated speed	47rpm
Rated torque	114NM ;
Opening speed	0.5m/s
Operating noise	<50dB(A)
Drive mode	Wire rope
Protection class	Ip54
Insulation class	Class F
Work mode	S1
Drive device	Uniform speed draw curtain device
Protective device	Stroke limit, mechanical limit
Dimension (L×W×H)	427*177.4*290mm
Weight	About 15.3kg
Auxiliary material	Lead car, safety board, guide pulley, etc.
