

Functional features

1. Dual protection of travel limit and mechanical limit
2. Fully assembled installation structure without welding
3. Any vacant position of the track auxiliary pole can be installed with a limit, and can be adjusted at any time to meet the ideal docking effect of the curtain
4. Using advanced virtual prototyping technology for track design, analysis, and calculation (providing complete 3D design modeling and mechanical analysis), providing copies of the manufacturer's product brochure and stamped with the bidder's official seal, and installing equipment and its accessories installed without welding)

Specification

Installation method	Hanging installation
Track type	Xm
Unilateral type	Xm
Type	Spliced triangular truss structure.
Load-bearing	Spacing between suspension <5m, centralized load 150kg, spread load 100kg/m every 3m.
Protection class	Limit switch, safety board
Track cross-section size	W216mm*H350mm
Track weight	8.7kg/m
Accessories include	All auxiliary accessories required for the equipment
